COMPLIANCE SOLUTIONS

Allan Koba Unveils KAboodle— The Next Generation in Medicare Secondary Payer Compliance

KAboodle is a revolutionary AI-powered platform that seamlessly integrates advanced large language models (LLMs) and agentic technologies to supercharge your existing Medicare Secondary Payer (MSP) compliance program. Harnessing the latest breakthroughs in machine learning and automation, KAboodle delivers:

1. Unmatched Efficiency
By leveraging agentic AI workflows, your compliance team can process cases faster and more accurately.

2. Error Reduction & Prevention
Advanced LLM-driven data validation radically minimizes costly penalties by catching errors before they happen.

3. Intelligent Risk Mitigation
Proactive, AI-fueled analytics and self-governing agentic features help you stay compliant and ahead of regulatory challenges.

Powerful Highlights

Custom Medicare Secondary Payer Workspaces
Eliminate the risk of Civil Monetary Penalties with timely, accurate Section 111 Reporting. Streamline compliance with AI-powered Future Medical Allocation and Conditional Payment workspaces for smarter forecasting and automated updates.

Medical Record Organization & Summarization
Generate rapid insights with AI-based parsing and context-aware LLM summarizations.

Powerful Highlights

OCR Technology Powered by Visual/Multimodal LLMs

Transform scanned records into structured, contextualized data using cutting-edge multimodal AI that interprets text, images, and formatting simultaneously.

Custom AI & Agentic Workflows

Configure advanced machine learning solutions and agentic automation tailored to your specific compliance needs, while maintaining a vital human touch in decision-making processes.

Payment History & Medical Record Comparison Tool

Uncover hidden discrepancies using LLM-based comparison and real-time anomaly detection.

Probability Analytics for Better Outcomes

Harness predictive modeling and LLM-powered simulations to optimize your resolution strategies.
