

Certified Legal Nurse Consultant Services

Certified Legal Nurse Consultants (CLNCs) draw upon years of critical analysis and medical expertise to build strategies for attorneys, insurance companies, and self-insured employers.

Clinical Liability Reviews

Certified Legal Nurse Consultants (CLNCs) perform clinical liability reviews, involving intricate and thorough assessments of medical records and documentation in legal cases. They ensure accuracy, assess treatment appropriateness, review medical bills, and clarify complex medical information for legal teams. These reviews support attorneys and insurers in developing strategies and making informed decisions in personal injury, medical malpractice, workers' compensation, and other liability cases.

Note: Clinical Liability Reviews do not offer medical or legal advice and do not replace a physician's medical-legal report.

Services Include:

Medical Record Review

Assess injury validity and work-relatedness.

Case Strategy Development

Assist attorneys in crafting legal strategies based on medical insights.

Medical Bill Analysis

Ensure accuracy and relevance of all submitted bills to the claim.

Research and Education

Conduct research and educate legal teams on medical aspects.

Expert Opinions

Establish connections between injuries and their relation to workplace incidents.
